Sahil Kureel

Senior Software Engineer (SDE-III) | Backend & Distributed Systems | Python, FastAPI, AWS | Scalable Microservices
Bengaluru, Karnataka, India

Summary

Backend Engineer (SDE-III) with 5+ years of experience designing and scaling distributed systems in production environments.At Head Digital Works (A23 Games), I build and optimize backend systems powering large-scale real-money gaming platforms such as A23Rummy and A23Poker. My work focuses on developing low-latency, highly reliable microservices that handle high concurrency and traffic at scale.I have strong experience in Python (FastAPI/ Flask), Node.js, and AWS, with a focus on system design, API architecture, and performance optimization. I've worked extensively on improving system reliability, scaling services, and ensuring secure backend development.Key strengths:• Distributed systems & microservices architecture• High-performance API design & optimization• Scalability, fault tolerance & reliability engineering• Backend security & vulnerability analysisI've worked in startup environments, contributing to MVP development and owning backend systems end-to-end.I enjoy solving complex backend problems and continuously learning in areas like distributed systems, cloud infrastructure, and system design.

Experience

Head Digital Works Pvt Ltd.

4 years 2 months

SDE - III
November 2022 - September 2025 (2 years 11 months)
Bengaluru

Designed and scaled backend microservices for high-traffic real-money gaming platforms
Built low-latency APIs handling high concurrency and large-scale user interactions
Improved system performance and reduced latency through optimization and efficient architecture

Led backend design decisions for scalable and fault-tolerant systems
Worked closely with cross-functional teams for production deployments and system reliability

SDE - II
April 2022 - November 2022 (8 months)
India

Developed and maintained backend services using Python (FastAPI/Flask) and Node.js
Contributed to microservices architecture and API design
Optimized service performance and improved system throughput
Ensured stability and reliability of production systems

SDE - I
August 2021 - March 2022 (8 months)
India

Built backend services and APIs for gaming applications
Worked on feature development, bug fixes, and deployment pipelines
Gained hands-on experience in scalable backend systems

Garg Consultancy Co
Back End Developer
August 2020 - July 2021 (1 year)
Gurugram

Developed backend services for multiple client applications
Worked with Python (Flask/FastAPI), Node.js, and AWS
Handled API development, deployment, and maintenance
Contributed to scalable and production-ready systems

LocalWell
Software Engineer
May 2019 - April 2020 (1 year)
Greater Ahmedabad Area

Started as Intern but later continues as remote, was part of initial stage team develop an MVP product.
Worked on backend system design and implementation for a medicine delivery application.

Yatra Online Pvt Ltd
Data Scientist intern
May 2018 - July 2018 (3 months)
Gurgaon, India

Worked as an Data science intern, learned about reinforcement learning models and churn prediction was my project which i had worked.

Elcome Technology Pvt Ltd (Hexagon Group)
Software Engineer Internship
May 2017 - July 2017 (3 months)
Gurgaon, India

I joined as an Intern for couple of months, learned about the corporate way of working (Agile, waterfall)
worked on a secured login system using C# programming language.

Education

ABV-Indian Institute of Information Technology and Management
Master's degree, Information Technology · (2015 - 2020)

Bhartiyam Vidhya Niketan,Gwalior
10+2 · (2014)
